PROFILE

Aspiring Data Analyst with a BSc (Hons) in Computing (2026) and previous experience in auditing, purchasing analysis, and IT support. Skilled in SQL, Excel, Power BI, and data visualization, with hands-on experience delivering end-to-end analytics projects. Strong combination of business understanding and technical problem-solving, seeking an entry-level Data Analyst or Analytics Internship opportunity.

TECHNICAL SKILLS

SQL / MySQL Workbench	Microsoft Excel	Power BI / DAX	Audit & Compliance
Python (in progress)	Data Cleaning	Dashboard Design	Supplier Analytics
Windows / IT Support	MS Office Suite	Statistical Analysis	

DATA ANALYTICS PROJECTS

FC26 Under-21 Player Scouting Analysis

SQL · MySQL Workbench

- Designed and executed an end-to-end SQL analytics project on FC26 player data to identify the highest-potential under-21 prospects across all positions
- Built a custom multi-factor potential scoring formula weighting current ability, age, and development ceiling
- Produced four budget-tier Dream Team XIs and five-season player development projections using advanced SQL (JOINS, GROUP BY, subqueries, window functions)
- Structured findings to simulate a real scouting brief demonstrating ability to translate data into actionable recommendations

FC26 Recruitment & Squad Development Dashboard

Power BI · DAX

- Built a two-page interactive Power BI dashboard on top of the FC26 SQL dataset, simulating a real recruitment analyst workflow from player discovery to squad investment decisions
- Page 1 - Recruitment Analysis: KPI cards (4,743 U21 players tracked), scatter plot of current rating vs potential, donut chart, ranked potential score table, and market value bar chart
- Page 2 - 5-Year Squad Development Simulator: four budget tiers (No Limit / 100–150M / 50–100M / Moneyball 0–50M) compared via multi-season rating growth line charts, per-player growth breakdowns, and filterable squad table
- Key insight: The Moneyball squad costs 83% less than the Elite Squad while achieving only 3.4 fewer overall points at peak development over a five-season period. These findings suggest that efficient scouting creates greater long-term value than transfer spending when recruiting U21 players

WORK EXPERIENCE

IT Field Engineer

Feb 2024 – Oct 2025

Cerco · Southampton, UK

- Diagnosed and resolved hardware and software faults across PCs, laptops, printers, and servers applying structured diagnostic thinking directly transferable to data quality and root-cause analysis
- Managed RMA processes and parts inventory, maintaining accurate records and compliance with company procedures
- Delivered desk-side support across multiple client sites, meeting service-level targets consistently

Internal Auditor

Mar 2020 – Oct 2020

Fortuna Group · Bistrita, Romania

- Conducted end-to-end audit cycles covering operational effectiveness, financial reliability, and regulatory compliance core data analysis competencies applied in a business context
- Designed and executed weekly audit plans; analysed accounting records, process flowcharts, and operational reports
- Produced detailed findings reports and risk memoranda for senior management, identifying process loopholes and recommending cost-saving interventions
- Carried out follow-up audits to verify implementation of corrective actions

Purchasing Analyst / Supplier Consultant

Jan 2019 – Mar 2020

Brammer · Cluj-Napoca, Romania

- Managed purchasing operations and supplier relationships across multiple product lines, using data to track stock levels and demand patterns
- Conducted market research and sales analysis to support commercial decision-making; negotiated pricing agreements with suppliers to achieve cost efficiencies
- Led supplier onboarding and performance management, ensuring consistent supply quality through KPI monitoring

EDUCATION

BSc (Hons) Computing

Sep 2022 – Jul 2026

Arden University

- Final Year Project (40 credits): Designed and developed a car rental mobile application covering requirements gathering, UI/UX design, and full build through to deployment
- Modules include: Data Analytics and Visualisation, Introduction to Databases, Data mining, Systems Analysis and Design, IT Project Management, Introduction to Programming, Human-Computer Interaction.
- Actively building data analytics portfolio alongside degree - SQL, Python, Excel, and Power BI

BSc Business Administration

Aug 2015 – May 2018

Babes-Bolyai University, Cluj-Napoca

- Relevant modules: Applied Mathematics & Statistics, Financial Management, Marketing Research, Strategic Management.
- Additional analytical modules: Organisational Behaviour, Operations Management & Logistics.

Fast Track IT Technician - ITOL Certified

Jan 2024

Cerco / Institute of Training & Occupational Learning

- Accredited certification covering hardware repair, diagnostics, and field support
